

# MEDITRADE ETHICS IN BRIEF

We keep the compliance with the law borders - commercial, civil and other law directions, including anti-corruption legislation.

We do not tolerate any fraudulent or dishonest conducts.

We do not tolerate any form of discriminatory behavior or sexual harassment.

Corporate events or conferences are organized in accordance with ethics.

We maintain our professional relationships with suppliers and customers. We avoid any conflicts of interest.

We are protecting internal, confidential and sensitive information. We do not act against our employer and clients on social networks in the form of comments, publication of facts and photos.

We have a responsible approach to the work tasks. We do not tolerate improper conduct that could in any way harm the reputation of our company and reputation of our clients, threaten economic growth or negatively affect the environment, where we operate.

We are constantly improving our work experience.

We are flexible in delivering of products and services to our customers.

We maintain the highest quality products and services.

We are a partner to our customers in providing the services.

Ethics and responsibility, however, should not remain on the statement. These words must be transferred into practice, because without their acceptance we can not be a leader with satisfied clients. And that is our primary goal.

With respect,

Pavel Bohdal  
CEO
